

APPENDIX A-146

LOCATION REVIEW CODES

1. Number of characters: One.
2. Type of code: Numeric.
3. Explanation: These codes identify the IM action recommended as a result of asset shortages at a Preferred Storage Location for a specific NSN. The codes appear on the SCS, appendix F-167, in conjunction with Reason for Study Code PO, appendix A-156.
4. Source: Item Management Data Change Transaction, DIC ZJM, is input with a Location Reorder Point Code, appendix A-155, and entered into the NIR where the location review level (months) is established. Whenever assets are below the specific location review level (months) in the NIR, a daily notification is passed to the SCF to generate a Reason for Study Code PO with the applicable Location Review Code on a SCS.
5. The following codes are assigned:

<u>CODE</u>	<u>DEFINITION</u>
1	Shortage to Location Reorder Point and no due-in recorded; or insufficient but timely due-in expected.
2	Expedite due-in; assets on hand and due-in sufficient, but due-in is not timely.
3	Shortage to Location Reorder Point, expedite insufficient due-in.
